AB An antistatic paste for floor cleaning and polishing consists of a 3:1 mixt. of polyethylene wax and montan wax 5-10, trimethylalkylammonium chloride 0.5-2.0, oxalic acid 0.1-0.3, AcOH 0.1-0.3, ethoxylated nonylphenol 0.5-2.0, and balance ligroin and water. The paste has a pH of 5-6, has bactericidal properties, and is suitable for both wooden (parquet) and plastic floorings. A typical paste consists of PMK-1 wax i.e., as WP-2 (polyethylene wax)-montan wax mixt. in a 3:1 ratio 5, trimethylalkylammonium chloride (where alkyl is derived from fatty acid) 0.5, oxalic acid 0.1, AcOH 0.1, ethoxylated nonylphenol (with 8 mol ethylene) 0.5, ethoxylated nonylphenol (with 5 mol ethylene) 0.5, water 6, and ligroin 87.3 wt. %.
